

Bronislav Li *AI engineer/startup developer*

📍 Currently in Hangzhou, China 🗂️ github.com/LBV-ai 💬 linkedin.com/in/bronislav-li

👤 Profile

Hi, my name is Bronislav. I am from Uzbekistan and currently studying at Beihang University in Hangzhou, China, where I'm working on a project focused on development and integration of AI systems for bionic creatures.

🧠 Skills

Frameworks

PyTorch, Keras, TensorFlow, Scikit-learn, Hugging-Face transformers, OpenCV

Databases

Postgres, MySQL, SQLite

Other

AWS(S3, EC2) and so on

📁 Projects

12/2025 – Present

Ai integration in Bionic creatures

Implementation of Artificial Intelligence system into nature-looking like creatures, using anomaly detection and 3D model visualisation technologies.

01/2025 – Present

Independent Projects

Developing personal projects in AI/ML, including chatbots, large language models (LLMs), and computer vision models (CNNs, RNNs).

04/2025 – 05/2025

Comprehensive action recognition project

Fine-tuned an open-source image recognition model to identify human actions in videos. Received top recognition/diploma in the Data Science program at ProWeb.

05/2025 – 06/2025

Translation & Support Team Member

One of the main translators in the research-questionnaire project. Assisted with online and on-site data collection for further development of the project.

🎓 Education

09/2025 – Present
Hangzhou, China

B.Ss in Computer Science and Technologies, Beihang university

Studying Computer Science and Technologies, currently conducting research on AI implemented in bionic-creatures.

09/2024 – 05/2025
Tashkent, Uzbekistan

Certified Data Scientist, Proweb education centre

Graduated with highest honors

🏢 Organisations

09/2025 – Present
Hangzhou, China

Beihang university, Student-researcher

09/2025 – Present
Hangzhou, China

ASIASIM Federation, student volunteer
